Dear Professor Casapueva,

First of all my congratulation to your election by the new chairman in the ad hoc working group of experts.

The Commission also has appointed an investigation committee in regard to Chili. The Government has accepted to collaborate with this group, of which I am a member.

I think it is of high importance that the work of this group which will start in the middle of may is well prepared and that the Junta does not mislead the group. Therefore I have to know where there are the tricky points, what we have to know in particular, whom we have to see etc. In my opinion it is not so necessary to study the historical background of the take-over but the past and present respect of human rights by the Junta. Please inform Mme Allende about that and help to organize some background informations and try to find by your compatriots their ideas about a solution to restore human rights in your country (ideas of recommendations). The investigation committee has to bring an interim report to the GA.

Yours faithfully

Felix Ermacora
